

QGIS Application - Feature request #10023

QGIS browser Alias for paths

2014-04-08 07:01 PM - Antonio Locandro

Status:	Open	Resolution: Copied to github as #: 18509
Priority:	Normal	
Assignee:		
Category:	Browser	
Pull Request or Patch supplied:	Supplied:	
Easy fix?:	No	
Description		
<p>I think being able to apply an alias to a path instead of displaying the full path as an option would be a great addition.</p> <p>e.g.</p> <p>Instead of</p> <p>C:/work/files/2014/honduras</p> <p>Have</p> <p>Honduras 2014</p> <p>Ideally one can press F2 (don't know other platforms if they have same shortcuts) or double click over path to apply alias</p>
