

## QGIS Plugin Site - Bug report #10035

### Upload plugin error

2014-04-09 03:58 AM - Luigi Pirelli

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>	Alessandro Pasotti	
<b>Category:</b>		
<b>Pull Request or Patch supplied:</b>		
<b>Description</b>		
<p>I'm doing maintenance of rt_omero plugin: <a href="http://plugins.qgis.org/plugins/rt_omero/">http://plugins.qgis.org/plugins/rt_omero/</a> and I backported some features to 1.8 version of the plugin code is here: <a href="https://github.com/faunalia/rt_omero/tree/master">https://github.com/faunalia/rt_omero/tree/master</a> (master is the 1.8 version and 2.0 is for actual qgis)</p> <p>after packaged the plugin (you can recreate the package usign "make package") I uploaded the plugin but result this errors</p> <p>1) "There were errors reading plugin package (please check also your plugin's metadata). The 'experimental' flag in the form does not match the 'experimental' flag in the plugins package metadata."</p> <p>but Experimental is not set and it's False in metadata.txt</p> <p>2) if I change in metadata.txt setting experimenta to True I've this error "There were errors reading plugin package (please check also your plugin's metadata). The 'experimental' flag in the form does not match the 'experimental' flag in the plugins package metadata."</p> <p>I'm uploading 1.1.2 version (as stated in metadata.txt) but there's no 1.1.2 version</p> <p>The problem could be related to this facts</p> <p>A) One hour ago I uploaded a 1.3.1 version for the actual qgis version... it is experimental</p> <p>p.s. choosing a category I can't fild one related to web site or web plugin management</p>		

### History

#### #1 - 2014-04-09 07:10 AM - Jürgen Fischer

- Project changed from QGIS Application to QGIS Plugin Site
- Category deleted (Plugin Manager)
- Target version deleted (Version 2.2)

#### #2 - 2014-04-09 12:29 PM - Alessandro Pasotti

Please provide:

- the plugin package
- step-by-step procedure to reproduce the problem (there are three different ways to upload a plugin)

#### #3 - 2014-04-10 12:50 AM - Luigi Pirelli

- File rt\_omero.zip added

1) attached the package  
2) procedure is  
go to: [http://plugins.qgis.org/plugins/rt\\_omero](http://plugins.qgis.org/plugins/rt_omero) (i'm logged)  
click on: Manage  
click on: Add Version => it goes to [http://plugins.qgis.org/plugins/rt\\_omero/version/add/](http://plugins.qgis.org/plugins/rt_omero/version/add/)  
select: choose file (selecting the attached package)  
leave unchecked Experimental checkbox  
leave checked Approved checkbox  
leave change log empty  
at the end... click on save

then I receive this error:

"There were errors reading plugin package (please check also your plugin's metadata).  
The 'experimental' flag in the form does not match the 'experimental' flag in the plugins package metadata."

three different way? really? howto?

#### #5 - 2014-04-10 01:37 AM - Alessandro Pasotti

1. the large "Share a plugin" blue button
2. the "Add Version" button
3. xml-rpc plugin upload method <http://plugins.qgis.org/plugins/RPC2/>

#### #6 - 2014-04-10 02:29 AM - Alessandro Pasotti

- *Status changed from Open to Closed*

As the error message says, you are uploading an experimental plugin version (experimental=True in metadata.txt) but you left unchecked the Experimental checkbox in the upload form (a checkbox is like a boolean field, checked=True, unchecked=False).

I don't understand what was not clear in the error message, suggestions welcome to make it more clear.

#### #7 - 2014-04-10 03:08 AM - Luigi Pirelli

ok thank you was my error in packaging... packaging script has absolute names creating package for the newest version (that is experimental)

sorry for the noise

#### #8 - 2014-04-10 03:18 AM - Luigi Pirelli

just a last note

uploaded the 1.1.2 plugin it's listed uncorrectly down the 1.1.11 => I should set 1.1.20 to restore correct ordering

#9 - 2014-04-10 04:10 AM - Alessandro Pasotti

Funny: I can't see any 1.1.2 in:  
[http://plugins.qgis.org/plugins/rt\\_omero](http://plugins.qgis.org/plugins/rt_omero)

#10 - 2014-04-10 04:39 AM - Luigi Pirelli

I changed version from 1.1.2 to 1.1.20 to avoid this problem
