QGIS Application - Bug report #10064
QGIS-Processing is broken in Master

2014-04-14 03:14 AM - Filipe Dias

Status:	Closed		
Priority:	Severe/Regression		
Assignee:			
Category:			
Affected QGIS version:	master	**Regression?:**	No
Operating System:	Linux Ubuntu	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	18540

Description

I just downloaded QGIS Master from Ubuntu nightly and Processing is not loaded. In the Plugin Manager it says:

This plugin is broken
Missing metadata file

I checked in this installation folder, and the metadata.txt file is present:

[general]
name=Processing
description=Spatial data processing framework for QGIS
category=Analysis
version=2.0
qgisMinimumVersion=2.0

author=Victor Olaya
email=volayaf@gmail.com
website=www.qgis.org

icon=images/alg.png

class_name=ProcessingPlugin

Is it really broken, or restarting QGIS fixes it? In this second case, this ticket is a duplicate.

#2 - 2014-04-14 05:10 AM - Filipe Dias

I read your ticket. It is really broken, apparently because of metadata issues.
