With the current commit:9a584ede (SVN r8287) QGIS shows the same behaviour like before commit:9893f4af (SVN r8268). I reopen the ticket.

I retried this with [[PostgreSQL]] 8.1.11/PostGIS 1.1 on Debian and [[PostgreSQL]] 8.2.4/PostGIS 1.2 on Windows by changing POLYGON and LINESTRING features.

Both worked fine with commit:9a584ede (SVN r8287). Could you provider a testcase?

Does commit:fa696cda (SVN r8291) fix this too?
