Crashes QGIS or corrupts data:	No	**Copied to github as #:**	18562	

Description

In Field Calculator window, the 'Selected function help' panel for the $uuid function displays only:

function help for $uuid missing

Looks like the file resources/function_help/$uuid is missing, even in master.

I created this file, recompiled QGIS and now the help is displayed.

File $uuid is attached. Could someone please add it to QGIS -- I have no commit permission.
