Crashes QGIS or corrupts data:	No	**Copied to github as #:**	18579

Description

The ~\\.qgis2\\python\\plugins\\processing\\grass\\description\\v.select.txt file is missing an 's' in line 8. It should read 'intersects' instead of 'intersect'.

This causes an error in GRASS when executing v.select from Processing.

To fix it just edit this file and change line 8 to read:

ParameterSelection|operator|Operator to use|overlap;equals;disjoint;intersects;touches;crosses;within;contains;relate
