

QGIS Application - Feature request #10133

Reccommendation for plugin writers: customization menu

2014-04-29 04:31 AM - Paolo Cavallini

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Documentation and Help	
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Easy fix?:	No	Copied to github as #: 18592
Description		
<p>From Radim comments.</p> <p>Customization only works for objects with objectName. objectName is automatically set by Qt for objects created in designer (compiled from .ui). For objects created programmatically it has to be set. Object names have to be added in all plugins.</p> <p>Recommendation for plugin authors: when you are adding QMenu or QAction, always set its object name, e.g.: myMenu = QMenu("My menu") myMenu.setObjectName("myMenu")</p> <p>See also #9134</p> <p>This should be added to Python manual/guidelines.</p>		

History

#1 - 2015-03-05 05:37 AM - Alexander Bruy

- Resolution set to fixed/implemented
- Status changed from Open to Closed

Already added in documentation master
