

QGIS Application - Bug report #1015

map legend resize

2008-03-27 09:08 AM - paoloC -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	GUI	
Affected QGIS version:		Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11075
Description		
<p>If you shrink the map legend window by drag and drop with mouse until it disappeared against the left GUI border, there are not possibilities to restore the original map legend width.</p> <p>In Linux I've just deleted qgis.conf in</p> <pre>/home/user/.config/QuantumGIS</pre> <p>Qgis recreates a new standard configuration file and map legend window gets its own default size.</p> <p>But in Windows XP?</p> <p>It seem there are not ways to restore map legend width (see figure attached)</p> <p>Wish: is it possible to put in view menu: "view map legend on/off" switch?</p> <p>Thanks.</p>		

History

Qt stores the settings in the windows registry. A workaround deleting the HKEY_CURRENT_USER\\Software\\QuantumGIS branch in the registry editor should do the same on windows than deleting the configuration files on Linux.

You should be able to resize the legend by pressing down the (left) mouse button on the dotted line and drag to the left - which the mouse cursor tries to indicated - or doesn't that work for you?

You should be able to resize the legend by pressing down the (left) mouse button on the dotted line and drag to the left - which the mouse cursor tries to indicated - or doesn't that work for you?

Ok, I've tried. But it doesn't work. See avi file attached (qgis.swf).

#4 - 2008-05-21 08:24 AM - Marco Pasetti -

- Resolution set to fixed

- Status changed from Open to Closed
