

QGIS Application - Feature request #10180

Show child relations in identify window

2014-05-05 03:10 AM - Nyal Dawson

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Unknown	
Pull Request or Patch supplied:		Resolution:
Easy fix?:	No	Copied to github as #: 18634
Description		
It would be nice to see the child features from a relation in the identify results panel. There could be a new group under each identified feature for each relation set up for the layer, and expanding the group shows all matching child features.

- Status changed from Open to Feedback

Isn't it fixed already?

#2 - 2014-07-28 09:29 AM - Matthias Kuhn

- Status changed from Feedback to Open

It's not yet implemented.
But it would be a nice feature.
