QGIS Application - Bug report #102
Invalid response from WMS server

2006-04-23 12:01 PM - Martin Dobias

Status:	Closed			
Priority:	Low			
Assignee:	Brendan Morley -			
Category:	Web Services clients/WMS			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Gentoo	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	duplicate	
Crashes QGIS or corrupts data:		**Copied to github as #:**	10161	

Description

I've tried to add this WMS server:

http://eusoils.jrc.it:80/wmsconnector/com.esri.wms.Esrimap/Eusoils_WMS?

This was response after pressing connect:

> Could not understand the response. The wms provider said:
> WMS Server responded unexpectedly with HTTP Status Code 404 (Object Not Found)
> Tried URL:
> http://eusoils.jrc.it:80/wmsconnector/com.esri.wms.Esrimap/Eusoils_WMS?SERVICE=WMS&REQUEST=GetCapabilities

But when tried in browser the same URL returned valid XML document.

History

#1 - 2006-04-23 01:45 PM - Gavin Macaulay -

- Resolution set to duplicate

- Status changed from Open to Closed

This is the same problem as ticket #3929.

I note that the map server in both cases is an ESRI product (from the .../com.esri.wms.Esrimap/... part of the URL).
