QGIS Application - Bug report #10208
Panel/Window with the results of identification should always open on click

2014-05-08 12:09 AM - Maxim Dubinin

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	GUI			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	18654	

Description

1. Add any layer

2. Choose identify tool and click on a feature -> Indetification results window will appear docked

3. Close the doc -> Bug 1 identification highlight stays

4. Click on another feature with identification tool -> Bug 2 Indetification results window does NOT reappear and one need to go to Panels to turn it back on.

This seems to be the case only under Ubuntu 13.10, 14.04 (tested) the behavior is normal under Win 7 (todays nightly).

History

#1 - 2014-05-08 06:22 AM - Giovanni Manghi

- Affected QGIS version changed from 2.2.0 to master

- Status changed from Open to Feedback

- Category set to GUI

- Subject changed from Window with the results of identification should always open on click to Panel/Window with the results of identification should always open on click

Cannot confirm 4) under master using Linux Mint (cinnamon DE).

#2 - 2014-05-08 08:10 AM - Jürgen Fischer

- Operating System deleted (Ubuntu)

- Status changed from Feedback to Closed

- Resolution set to fixed/implemented

fixed in commit:4ecb1789
