

QGIS Application - Feature request #10272

Test value input for expression builder

2014-05-14 09:29 PM - Nathan Woodrow

Status:	Open	Resolution: Copied to github as #: 18704
Priority:	Normal	
Assignee:	Nathan Woodrow	
Category:	Expressions	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>It would be nice to be able to provide test field values for the expression builder to test expressions before applying. This should allow an entry box for each field that is defined in the expression area. Sometimes the first feature doesn't expose enough information to test an expression.</p>

Maybe a box as in the query builder would be enough, with the option "Show first 10 results" and "Show all"?
