QGIS Application - Feature request #1029
Add support for predefined symbologies

2008-04-10 10:03 PM - Brent Wood

Status:	Closed		
Priority:	Low		
Assignee:	nobody -		
Category:	Symbology		
Pull Request or Patch supplied:		**Resolution:**	worksforme
Easy fix?:	No	**Copied to github as #:**	11089

Description

It would be useful to be able to create & store custom symbologies/settings, which can be associated with a layer, outside of the project capability, so that a given layer can be opened in several sessions/projects, but be able to utilise a shared/common symbology easily in all of them.

Did you really try HEAD? I assume you version didn't contain qml support (layer styles), which seems to be what you describe.

#2 - 2008-04-30 06:22 AM - Jürgen Fischer

- *Resolution set to worksforme*
- *Status changed from Open to Closed*

no response for 3 weeks. probably solved.
