QGIS Application - Bug report #10402
QGIS master categorized symbology: column repeated

2014-05-30 09:54 AM - Giovanni Manghi

Status:	Closed			
Priority:	Severe/Regression			
Assignee:				
Category:	GUI			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	duplicate	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	18818	

Description

In QGIS master after selecting an attribute for a categorized symbology the choosen attribute column shows repeated when selecting the dropdown at a later time, see image
 ("campo2" is a column name that it is not repeated in the table of attributes)

@Nyall this is something different.

#3 - 2014-05-31 05:14 AM - Nyall Dawson

I don't think it is... the widget is showing the current 'expression' as the last value in the combo. If a single column has been selected, then the 'expression' is just the column name, so it looks like a duplicate. That's why I think showing this expression option in italics could help differentiate it. On the other hand, hiding it if it's a duplicate would work just as well!

Ahh I see what you mean. I think first try to find the field, if not assume it's an expression and add it to the bottom.

I will have a go now.
