Crashes QGIS or corrupts data:	No	Copied to github as #: 18851
Description		
<p>Alias fields elements in .qgs projects aren't removed when alias are unset (= made blank, empty string). An empty "name" attribute is kept for that field. E.g.:</p> <pre><aliases> <alias field="image" index="2" name=""/> </aliases></pre> <p>I suggest to remove the element when the alias is empty.</p>
