

QGIS Application - Bug report #10462

Log File Button missing on QGIS Master Ubuntu 14.04

2014-06-04 10:07 AM - Randal Hale

Status: Closed	
Priority: Normal	
Assignee:	
Category:	
Affected QGIS version: master	Regression?: No
Operating System: Ubuntu 14.04	Easy fix?: No
Pull Request or Patch Applied: No	Resolution: worksforme
Crashes QGIS or corrupts data: No	Copied to github as #: 18874
Description	
IN the bottom right hand corner of QGIS you have the CRS status button. To the right of that there should be a log file button (small exclamation point). That is missing. I last updated my install of QGIS 2.3 master on the morning of 20140604.	

History

#1 - 2014-06-04 12:04 PM - Pedro Venâncio

I can not confirm. The button appears when an event is logged (for instance, an Python warning).

#2 - 2014-06-04 02:43 PM - Giovanni Manghi

- Status changed from Open to Feedback

cannot confirm here.

#3 - 2014-06-06 01:42 AM - Leyan Ouyang

It appears when there is a new event, but if you open the log window then close it, the button disappears. In that case, you have to go to view->panels->log messages to see the log messages.

I would also prefer to have it all the time available. It would not clutter much more than now as it is present at each startup anyway.

#4 - 2014-06-07 02:13 PM - Jürgen Fischer

- Resolution set to worksforme

- Priority changed from High to Normal

- Status changed from Feedback to Closed

probably just a observation of the intended behaviour. The icon appears when there's something new in the log and the log is hidden.
