QGIS Application - Bug report #10477
Shortcut CTRL+R to invert selection is not working

2014-06-05 03:08 PM - Jerome Alary

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Attribute table			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	invalid	
Crashes QGIS or corrupts data:		**Copied to github as #:**	18889	

Description

Attribute Table propose to use CTRL+R to invert the selection but it's not doing it.

History

#1 - 2014-06-28 07:45 AM - Jürgen Fischer

- Target version changed from Version 2.4 to Future Release - High Priority

#2 - 2015-02-05 11:56 AM - Rémi Chalmel

In Attribute Table too, when "Ctrl+S" is used, it inverts selection instead of save changements (Windows 7, QGis 2.7-fe27b63(=2.7.0-89)

#3 - 2015-02-07 01:56 AM - Giovanni Manghi

- Operating System deleted (Windows)

- OS version deleted (8.1)

- Affected QGIS version changed from 2.2.0 to master

Other shortcuts also also not working like ctrl-j. In my case (master on linux) ctrl-s does nothing too (not even the inverting the selection, that would be anyway wrong).

#4 - 2015-06-18 11:45 PM - Nathan Woodrow

- Resolution set to invalid

- Status changed from Open to Closed

Seems to be working fine in master and 2.8
