

QGIS Application - Bug report #10503

Value Relation field value is not saved

2014-06-09 01:22 AM - Milos Kroulik

Status:	Closed	
Priority:	Severe/Regression	
Assignee:	Jürgen Fischer	
Category:	Vectors	
Affected QGIS version:	master	Regression?: No
Operating System:	Ubuntu	Easy fix?: No
Pull Request or Patch applied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 18913
Description		
<p>I'm trying to use Value Relation field widget to allow editing relations based on enumeration table. In previous version (2.2) everything worked fine. Now, if I'm trying to use filter field, it's value is not saved and is blank the next time I load the widget form. It happens immediately after I save the form.</p> <p>Also, the "Expression button" above the filter field does nothing - I am not sure, if these issues are related in any way.</p> <p>Please let me know, if you need more info.</p>		

Associated revisions

Revision fafe8fd3 - 2014-06-09 03:45 PM - Jürgen Fischer

value relation: save filter expression correctly and re-enable filter expression button (fixes #10503)
