

QGIS Application - Feature request #10553

background of the annotation text window's text box should be set to the annotation's background color

Easy fix?:	No	Resolution: Copied to github as #: 18960
Description Right now, the background color of the edit text box in the Annotation Text window is always set to the OS default (mostly white). It becomes a problem when you change the annotation's text color to white (with a non-white annotation background color), see the attached screenshot. When text color is white, it "disappears" on top of a white background. The easy solution here is for the text box's background color to be set to the user-chosen annotation background color. I'm flagging this as a feature request, but for some users, I'm pretty sure it would be perceived as a bug if he/she thinks his/her text just vanished.
