Crashes QGIS or corrupts data:		**Copied to github as #:**	18971	

Description

I'm getting a number of errors while attempting to paste features as a new memory layer:

"Cannot create field create_dat (Date,QDate)" while attempting to paste from a shapefile

"Cannot create field origin (varchar,QString)" while attempting to paste from a postgis layer

This used to work, it's broken sometime during 2.4
