

QGIS Application - Bug report #10566

DB Manager : Impossible to add a geometryless table

2014-06-12 06:41 AM - Harrissou Santanna

Status:	Closed	
Priority:	Severe/Regression	
Assignee:	Jürgen Fischer	
Category:	DB Manager	
Affected QGIS version:	2.0.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 18973
Description Open DB Manager and connect yourself to a PostGIS database Drag and drop a table or view without geometry column from the table list to the map canvas You get a pop up saying that the layer you're trying to put in the canvas is not valid and won't be added. The same table can be added through DB Manager in QGIS 1.8 but no more since 2.0. The same table or view can though be added to the layer list when using Vector menu > Add PostGIS Layer in Master or previous.
