QGIS Application - Feature request #10569
no "append data to table" option

Description

Steps:

1. Open DB Manager and connect to a database
2. Select the "import layer/file" tool

In the dialog opened, you'll notice that the "append data to table" option is greyed out. This doesn't change even if the output selected is an existing table in your database. There is no way to append data directly to your table with this tool.
Seems that has never worked since it is added in QGIS 2.0.
