

QGIS Application - Feature request #1060

Build symbols over db fields

2008-05-06 03:33 AM - pls -

<b>Status:</b>	Closed	<b>Resolution:</b> fixed <b>Copied to github as #:</b> 11120
<b>Priority:</b>	Low	
<b>Assignee:</b>	nobody -	
<b>Category:</b>	Symbology	
<b>Pull Request or Patch supplied:</b>		
<b>Easy fix?:</b>	No	
<b>Description</b>		
<p>It would be very useful to have the opportunity to build up a raster to be used as a symbol in a map exploiting values of different fields of a database associated to a vector layer (e.g. a shapefile)</p> <p>Referring to the attached picture, it could be possible to fetch the main symbol from the "Type" field, colour from "Status" and fill style from "Property"</p>		

History

#1 - 2011-03-05 03:15 AM - Paolo Cavallini

- Resolution set to fixed
- Status changed from Open to Closed

If I understand it correctly, this has been implemented with rule-based symbology. Please reopen if not. Thanks.
