

QGIS Application - Feature request #10627

Attribute table - highlight rows that cause commit issues

2014-06-18 08:29 AM - Antonio Locandro

Status:	Open	Resolution: Copied to github as #: 19030
Priority:	Normal	
Assignee:		
Category:	Attribute table	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
Currently the log message provides in canvas the details of the affected rows including the number or Errors, it would be nice if the rows that cause the failing message could be highlighted, even better the specific problematic values Could not commit changes to layer lower_ats_routes Example Errors: ERROR: 3 attribute value change(s) not applied. Provider errors: PostGIS error while changing attributes: ERROR: new row for relation "lower_ats_routes" violates check constraint "check_geo_dist_update_types" DETAIL: Failing row contains (29, null, A322, LOWER, All, Both, FIR MHTG, A322_04, ATS, 219, 039, 16.6634 NM, 19500, 12000, COCO ACC 119.6 MHz APP 120.5 MHz, 10 NM, C, 1/MAY/14, BARVA, DVOR/DME TIO, 04, null, 0105000020E61000000100000001020000000200000068853F7C860355C020BC..., null, null, null, 16.66, 16.72, 0.06, f). In my case the column just can accept A or M values		

History

#1 - 2014-06-20 08:48 AM - Jürgen Fischer

- Category set to Attribute table

#2 - 2017-05-01 12:47 AM - Giovanni Manghi

- Easy fix? set to No

#3 - 2018-03-19 06:25 PM - Antonio Locandro

Still not added in master, but need to check if this is something other people would want
