QGIS Application - Feature request #10629
Display data-defined symbology in legend

2014-06-18 09:40 AM - Paolo Cavallini

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Symbology		
Pull Request or Patch supplied:	No	**Resolution:**	duplicate
Easy fix?:	No	**Copied to github as #:**	19032

Description

It is possible to assign colours to vector items taking the value (as hex, html colours) from a filed of the associate table. However, this assignment will not appear on the legend, which is a major drawback.
More generally, displaying also data-defined symbology would be a major improvement.
