Crashes QGIS or corrupts data:		Copied to github as #: 19033
Description Hi. I have a simply CSV layer of place names and lat/long coordinates. They had the default marker which was size 2 circles, purple fill black border. Steps taken: 1. change size to 1 2. select border colour button. Change alpha to 0 (transparent) 3. [error may have occurred here, not sure] change symbol to a cross 4. markers not present on map 5. go back into style properties. border colour button no longer available; "Border" label still present. Cheers		

History

#1 - 2014-06-18 12:14 PM - Nyall Dawson

- Status changed from Open to Feedback

This should be fixed in the current master version. Can you please confirm your version number?

#2 - 2014-06-18 12:24 PM - Simon Dedman

code revision 70225a3. Thanks, I'll update now.

#3 - 2014-06-19 03:33 AM - Giovanni Manghi

- Resolution set to fixed/implemented

- Status changed from Feedback to Closed

is fixed in master, reopen if necessary.
