

QGIS Application - Bug report #10638

WFS GetFeature may be incomplete if layer reports estimated feature count

2014-06-19 02:44 AM - Marco Hugentobler

Status:	Closed	
Priority:	High

Category:	QGIS Server	
Affected QGIS version:	2.2.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 19041
Description		
Hi René-Luc		
layer->featureCount() sometimes returns an estimated feature count. In this case, the WFS server returns an incomplete reply (if called without maxfeatures).		
Is it possible to make QgsWFSServer::getFeature a bit more robust against this? E.g. using		
while (fit.nextFeature(feature) && (featureCounter < maxFeat maxFeatures == -1))

Hi Marco,
Probably fixed by commit:9d90923a9b1e67d708dca96f0ea75c40257910a7
Can you test it ?
