

QGIS Application - Bug report #10658

Repeated Layer name

2014-06-20 02:21 AM - Paolo Cavallini

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	GUI		
Affected QGIS version:	2.2.0	Regression?:	No
Operating System:		Easy fix?:	No
Pull Request or Patch supplied:		Resolution:	fixed/implemented
Crashes QGIS or corrupts data:		Copied to github as #:	19057
Description			
In Vector properties > General > Layer name there is a field called "displayed as", apparently useless and confusing, as it seems just an echo of the adjoining field "Layer name"

Layer name could be the name in a postgis table for example, **displayed as** I would say should work more like an alias, in my opinion Layer name shouldn't be editable and just be read only as this gives you the name of the layer in provider, **displayed as** should be editable so people can use another name if desired, of course by default it would echo layer name

As it is right now it's useless but as I have outlined above it could be useful

#2 - 2014-06-20 01:46 PM - Paolo Cavallini

The current behaviour is not that outlined by Antonio. I suggest removing the current label, and open a new feature request to add what Antonio is asking.

#3 - 2014-07-02 09:13 AM - Antonio Locandro

Done! #10779 Request added

#4 - 2017-05-01 01:08 AM - Giovanni Manghi

- *Regression? set to No*

- *Easy fix? set to No*

#5 - 2018-02-24 04:41 PM - Paolo Cavallini

- *Resolution set to fixed/implemented*

- *Status changed from Open to Closed*

Now OK in QGIS 3
