<b>Description</b>		
<p>There are a number of modules that need a coordinate to work, actually the user must fill this manually (writing or copying pasting) that is sub optimal.</p> <p>The optimal solution would be a button to allow click on the canvas and have the coordinate filled.</p> <p>Ex:</p> <p>r.lake</p> <p>r.los</p> <p>and many more (not only GRASS).</p>
