<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 19091
<b>Description</b>		
<p>I have a point layer with an activated filter expression subset. In the layer style properties, I classified my data categorized by (actually classified by year). I used the feature blending mode 'lighten'. feature blending mode is a brilliant invention by the way!</p> <p>If I know change my layer filter expression, the feature blending mode doesn't update automatically. I first have to delete all the content of the legend, classify again, apply, and then I have the updated feature blending of the updated filter expression. I think the feature blending mode should update automatically after an updated filter expression?!!</p> <p>The bug occurs in QGIS 2.2 and 2.3</p>		

#### History

##### #1 - 2014-06-28 07:45 AM - Jürgen Fischer

- Target version changed from Version 2.4 to Future Release - High Priority

##### #2 - 2017-05-01 01:08 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

##### #3 - 2019-03-09 04:09 PM - Giovanni Manghi

- Resolution set to end of life

- Status changed from Open to Closed

**End of life notice: QGIS 2.18 LTR**
