Operating System:	All	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	11134

Description

If a layer is selected in the WMS connection dialog and the 'Add' button is pressed, there is an error message which tells that at least one layer needs to be selected. It works with two layers selected.

Associated revisions

Revision 92c73287 - 2008-06-09 03:35 AM - Tom Elwertowski

Additional conversion from Q3ListView to QTreeWidget. This is an addition to r8406 and fixes #1074.

For Q3ListView, each item is already set to the new selection state when on_lstLayers_selectionChanged is called. For QTreeWidget, each item still has the old selection state and selectedItems() must be used to get the new selection state.

History

#1 - 2008-06-08 06:54 PM - Tom Elwertowski

[[QgsServerSourceSelect]]::on_lstLayers_itemSelectionChanged() was not fully converted from Qt3 to Qt4 in commit:21708a56 (SVN r8407).

For Q3ListView, each item is already set to the new selection state when on_lstLayers_selectionChanged is called. For QTreeWidget, each item still has the old selection state and selectedItems() must be used to get the new selection state.

#2 - 2008-06-08 06:55 PM - Tom Elwertowski

- Resolution set to fixed

- Status changed from Open to Closed

Fixed by commit:03fbf87d (SVN r8629).
