

QGIS Application - Feature request #10834

Allow labels to be rendered with multiple cores

2014-07-07 10:32 AM - Donovan Cameron

Status:	Open	Resolution: Copied to github as #: 19208
Priority:	Normal	
Assignee:		
Category:	Labelling	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
<p>I really like how quickly features are rendering on screen when multiple cores are enabled for QGIS 2.4.</p> <p>I noticed that that doesn't apply to labels though and that's where rendering on some maps with complex labels comes to a grind.</p> <p>QGIS could see some major performance increases in rendering if it was possible for labels to be to use multiple cores as well.</p>
