

QGIS Application - Bug report #10858

Datasource file name in .qlr file should be relative to .qlr file

2014-07-09 06:56 AM - joto -

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Project Loading/Saving		
Affected QGIS version:	2.4.0	Regression?:	No
Operating System:		Easy fix?:	No
Pull Request or Patch supplied:	No	Resolution:	
Crashes QGIS or corrupts data:	No	Copied to github as #:	19227
Description			
<p>When reading a .qlr file the file name in the datasource is currently interpreted relative to the directory QGIS was started in instead of relative to the directory the .qlr file is in. This makes it harder to distribute .qlr files with your data in a way that is easy to use.</p>
