Description

In QGIS 2.4 there is no option to set the default values(NULL) on date fields in QGIS 2.4 if we have not updated any value on date fields. Its automatically taking the current system date. we are expecting to set the default values(NULL) for date fields in properties of layer, since we have to display the NULL values while capturing the new feature itself. It may be edited if required. Please refer the attached screen shots.
