

QGIS Application - Bug report #10897

Openlayer plugin not appearing when reinstalled in 2.4.

2014-07-15 07:09 PM - Margaret Willis

Status:	Rejected	
Priority:	Normal	
Assignee:	Borys Jurgiel	
Category:	Plugin Manager	
Affected QGIS version:	2.4.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 19262
Description		
<p>I understand that the Openlayer plugin is auto loaded with 2.4.</p> <p>Unfortunately I accidentally removed this plugin in order to reload it when it crashed my system.</p> <p>I have been able to install it again but the dropdown icon refuses to show in the plugin box meaning I still can't access it.</p> <p>I presume this may be because the openlayers plugin is still being fixed for 2.4 but I have this issue was closed off in some commentary???</p> <p>Any help most appreciated.</p>

- Resolution set to invalid

- Status changed from Open to Rejected

The plugin is installed under the Web menu.

Tickets against the plugin should be opened on the relative bugtracker, not here.

Thanks.
