<b>Description</b>		
<p>For some strange reason changing attribute data via attribute form duplicates whole feature.</p> <p>Steps to reproduce:</p> <ul style="list-style-type: none"><li>- Create a new shapefile with any attribute column (tested points/lines with floats/strings)</li><li>- Digitize few objects and fill some attribute data info</li><li>- Use "identify" tool to open attribute form for any of objects</li><li>- Change the attribute data and OK results</li><li>- Saving / enabling-disabling editing seems to be optional</li></ul> <p>Results: The object is duplicated. One copy contains the old attribute data; second - the new attribute data.</p> <p>Editing attributes in the attribute table seem to work just fine.</p> <p>Tested with:</p> <p>QGIS versija 2.5.0-Master QGIS koda revīzija 57dcfca</p> <p>Compiled against GDAL/OGR 1.10.1 Running against GDAL/OGR 1.10.1</p> <p>Compiled against GEOS 3.4.2-CAPI-1.8.2 Running against GEOS 3.4.2-CAPI-1.8.2 r3921</p>
