

QGIS Application - Bug report #10987

Fonts for number boxes/int displayed in foreign language(Khmer)

2014-07-30 08:38 AM - marc-antoine chabot

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	GUI	
Affected QGIS version:	2.4.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: end of life
Crashes QGIS or corrupts data:		Copied to github as #: 19330
Description		
<p>Weird issue on a single computer.</p> <p>Everywhere there's a number box, or even when I convert a string to a number on the composer, I get a change of regional script for the numbers used.</p> <p>Example: 47% shows up as ៥៧%</p> <p>http://en.wikipedia.org/wiki/Khmer_numerals</p> <p>See screenshot. Copied and pasted number field in a notepad for clarity.</p> <p>Any suggestion on how to locally fix this?</p> <p>Windows 7 enterprise. Run off a local folder. Both 2.0 and 2.4 portable have the issue on that computer.</p> <p>Please note I am using the portable version of 2.4.0 on a computer where I don't have local admin rights.</p>		

History

#1 - 2014-07-30 08:39 AM - Giovanni Manghi

- Category set to GUI

#2 - 2014-07-30 09:10 AM - marc-antoine chabot

- File khmer_1.jpg added

Also note that Labels are also behaving this way, not just the GUI.

A field named "Frequency" will show up just fine on a map, but if I try to format it differently, it will show up in Thai or Khmer.

(I don't use either language. Just French/English for me)

example:

field is Frequency with value 162.500

`format_number("Frequency",3) > ៥៧៥០០` (162.500 in khmer fonts)

`"Frequency" > 162.5`

screenshot has the following label:

`concat(format_number("Frequency",3),' ; ','Frequency')`
