<b>Crashes QGIS or corrupts data:</b>	Yes	<b>Copied to github as #:</b> 19365
<b>Description</b>		
<p>Hi,</p> <p>this is my first try to report a "bug", hope i'm doing ok:</p> <p>opening a QGIS project where a GRASS vector was saved in the QGIS layers panel, but the GRASS database is actually missing (say you moved it to another folder), you get QGIS to crash immediately.</p> <p>This does not happens with rasters.</p> <p>thanks, Roy.</p>
