

QGIS Application - Feature request #11042

Add option to randomly assign colors from a specified color ramp

2014-08-12 07:28 PM - Evan Derickson

Status:	Open	Resolution: Copied to github as #: 19381
Priority:	Normal	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>Random color ramps were added sometime in the 2.x series. Currently, the user selects a random color ramp as an alternative to a pre-defined ramp. However, there are cases where the user may want to select a specific color ramp and then assign the colors of that ramp randomly to features in the layer. For example, the user may have a palette of subdued colors, or only want random blues. This setting should also have a check against adjacent features being assigned the same color.</p> <p>This would be an option in the selection box at the top of the <i>Style</i> tab, next to the <i>Single Symbol</i>, <i>Categorized</i>, etc. options.</p>
