Status:	Closed	
Priority:	Low	
Assignee:		
Category:	Labelling	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: end of life
Crashes QGIS or corrupts data:	No	Copied to github as #: 19402
Description		
When using Background on road names I expect it to show one homogeneous background, but instead I get one background per letter. It only occurs when I use "Curved" placement for the label, and I'm not sure there's much to do about the issue. (attaching screen cap)
