

QGIS Application - Bug report #1107

Mapfile export - DATA parameter does not work for the case sensitive PostGIS table names

2008-05-23 02:37 PM - str238 -

Status:	Closed	
Priority:	Low	
Assignee:	Gary Sherman	
Category:		
Affected QGIS version:		Regression?: No
Operating System: All		Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11167
Description		
The DATA parameter is incorrectly written into the mapfile when [[PostGIS]] layer used. There are no double quotation used for the table name and that is why the case sensitive table names in [[PostGIS]] database are not found. DATA 'the_geom FROM public.CN_2007_orez' should be like (schema and geometry column name can be case sensitive as well) DATA "'the_geom" FROM "public"."CN_2007_orez"
