

QGIS Application - Bug report #11092

Saving vector layer with empty name might be forbidden

2014-08-25 01:32 AM - Harrissou Santanna

Status:	Closed	
Priority:	High	
Assignee:		
Category:		
Affected QGIS version:	2.4.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 19425
Description Open a project Add a vector layer Right-click > Save as 1/ choose output format as MID/MIF for e.g.. Don't choose output name nor directory and save. You got a successfull message bar. if u had checked "add to map canvas", then you got a warning message bar concerning the incompatibility of the file format. 2/ Choose SHP for the file format and without filling a name, save. You get the same successfull message bar but if you had checked "add to map canvas", QGIS crashes. When saving a raster layer, the ok button is greyed till you fill the file name. This should be used for vector layer, too, I think.

Revision acf1f70f - 2014-08-30 09:03 AM - Jürgen Fischer

Fix #11092:

- fix crash when invalid shapefile layer is repacked
- error out if vector file writer is invoke with an empty filename
- don't allow "Save as..." without a given filename
