Hi Paolo,

yes, I think it depends on the missing jpeg library in my builds.

It will be probably added into the next releases.

Great! Thank you Marco. You have a beer paid here in Evora.

BTW: also GML support is missing from GDAL as you packaged it. If possibel, plese remember to include this as well in the next release.

All the best.

Hi Paolo,

mmm... I suppose it's too far for just a beer :-)

BTW, please, write a down a list of GDAL wishes and send it to me by mail.

Marco
