

QGIS Application - Bug report #11108

Semi-Automatic Classification Plugin error

2014-08-27 07:32 AM - Scott Madry

Status:	Rejected	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	2.4.0	Regression?: No
Operating System:	Macbook Pro 10.9.2	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 19438
Description I am trying to use the Semi-Automatic Classification Plugin tutorial and cannot get the first step to work correctly. On trying to Apply DOS1 correction, when I PERFORM CONVERSION, I get two errors. First GDAL provider; Cannot open GDAL dataset ...does not exist in the file system and is not recognized as a supported dataset name. raster layer" Provider is not valid. Then a second one "An error has occurred while executing Python code".		

History
