Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Easy fix?:	No	Copied to github as #: 19480
Description it would be useful to have a function to save a VRT file containing the QGIS layers in <OGRVRTDataSource> format definition. A good description is : http://www.portailsig.org/content/ogr-que-la-force-soit-avec-les-formats-virtuels There is a python script in : http://svn.osgeo.org/gdal/trunk/gdal/swig/python/samples/ogr2vrt.py Perhaps, It could be inserted in processing ?
