

QGIS Application - Bug report #11177

hot keys configuration problem

2014-09-10 04:43 AM - Michal Baran

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Browser	
Affected QGIS version:	2.4.0	Regression?: No
Operating System:	Win 8.1	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: end of life
Crashes QGIS or corrupts data:	No	Copied to github as #: 19491
Description 1. In previous versions of QGIS it was OK, but in ver. 2.4 I can't permanent change hot keys profile :(I have prepared list of using by me hotkeys (in xml format) and I must manually correct this properties every time after reboot/restart QGIS. For example, I using F5 key for rectangle marking any elements, but in 2.4 version this keys is default assign to refresh command. In menu Settings/Configure shortcuts dialog window I see F5 at 'Refersh' (default) and at 'rectangle mark' (by me). I can use mark command only when delete first case. 2. Is it possible use any hotkey for turn on/off visible Layers panel? Best regards MB
