

QGIS Application - Bug report #11189

No shp edit mode when query used?

2014-09-11 03:43 PM - James Harvey

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	2.4.0	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: up/downstream
Crashes QGIS or corrupts data:	No	Copied to github as #: 19501
Description I am using a feature subset query that i can't edit via the query builder. I am using rule based layers as well, but I noticed that with this combination I cannot edit the SHP file - I wanted to do a copy and paste from another SHP file. Is this done for any reason or can editing be supported with this mode? At the moment my only work around is to open the files without these queries attached and then do a copy and paste and then save on them. Unsure if this is a bug or a feature request.

- Resolution set to up/downstream
- Status changed from Open to Closed

Unfortunately this is a limitation with the OGR driver. Once you set a filter on a layer we loose edit ability.
