Hi,
sorry for my late respond.
I did nothing than click "Project" - "close".

Where could I send the minidump to?

Thanks and greetings
Torsten

I have seen this issue a number of times and most of them the issue was caused by a plugin or an old configuration still hanging in the .qgis2 folder.

Please delete the .qgis2 folder (eventually make a backup of it beforehand) and try again.

Please reopen if necessary.
