

QGIS Application - Bug report #11212

Processing model - v.db.select

2014-09-16 08:16 AM - Giuseppe Patti

Status:	Closed	
Priority:	Normal	
Assignee:	Victor Olaya	
Category:	Processing/GRASS	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 19522
Description		
Grass module v.db.select doesn't work if inserted in a model, warning about a missing or invalid parameter value even if also the advanced parameters are filled, but it works if used as an algorithm directly from processing

could you paste here the whole grass output with that error so we can debug it?

Thanks!

- *File processing_model_error.PNG added*

Sorry, there is no grass output (the tool v.db.select runs fine outside the model), I'm just trying to add the algorithm to my model, and as soon as I set all the mandatory fields and click the "OK" button it fires up the error, see the attached screenshot

- Target version set to Future Release - Nice to have
- Affected QGIS version changed from 2.4.0 to master

#8 - 2016-02-12 12:43 PM - Médéric RIBREUX

- Status changed from Open to In Progress

Hello,

I have made PR for #11212. This was a problem in the definition of some parameters. It should be fixed with the PR.
I hope it will be integrated into QGIS 2.14...

#9 - 2016-02-16 08:26 AM - Alexander Bruy

- Status changed from In Progress to Closed

Fixed in changeset commit:"a15f51e71ba526fd4b5512a13e989a6b8579f580".
