QGIS Application - Bug report #11225
Processing tools don't work without opening the configuration

2014-09-18 06:41 AM - Howard Frederick

Status:	Closed		
Priority:	Normal		
Assignee:	Victor Olaya		
Category:	Processing/Core		
Affected QGIS version:	2.4.0	**Regression?:**	No
Operating System:	OS X	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	19534

Description

Scripts, GRASS and R scripts don't run after QGIS is first opened. Scripts give an error when run:

Algorithm Regular sampling grid starting...
coercing to Unicode: need string or buffer, QPyNullVariant found See log for more details

GRASS claims missing dependencies.

Both of these are fixed by opening Processing | Options and configuration and interacting with any of the options - toggling scripts as a provider, opening and checking the GRASS folder. Afterwards all the functions work.

History

#1 - 2014-11-08 12:11 AM - Howard Frederick

This problem no longer occurs in 2.6.

#2 - 2014-11-08 12:23 AM - Paolo Cavallini

- *Resolution set to fixed/implemented*
- *Status changed from Open to Closed*

#3 - 2015-06-07 04:33 AM - Giovanni Manghi

- *Category changed from 94 to Processing/Core*
